### About me:

I am a Graphic Designer with a years experience looking for Junior role within the design and advertising industry.

I am an enthusiastic, bright young man, who excels under pressure, resolving problems and meeting challenges with a touch of humour and wit. I am passionate about everything I do, and enjoy working with other people, I feel my ideas and ingenuity grow and flourish when working alongside other creatives.

Generating ideas is what I love most about design. Sitting down and sketching on an envelope the next global campaign, or coming up with the killer tag line that completes the advertisement. Enjoying the three years at university has made up my mind to enter and succeed in an industry where no two briefs are the same.

I have even been known to say 'put me into an empty room with a problem and I shall colour the walls with ideas.'
